ADVANTAGES

of employing the Corporation as Executor in preference to a private individual.

(1) **CONTINUITY OF SERVICE**—The Corporation never dies, does not abscond or change its place of residence.

(2) **ABSOLUTE SECURITY**—Its Capital and Reserves of $1,300,000 afford ample security for all business entrusted to it.

(3) **EXPERIENCED MANAGEMENT**—The wisdom and experience of the Corporation's Board of Directors and trained staff of officers are at the service of every estate in its care.

(4) **REASONABLE CHARGES**—The compensation, which is fixed by the Surrogate Court, is in no case greater than is allowed private trustees for the same work.

(5) **SOLICITOR**—The private executor employs his own solicitor. The Corporation employs the testator's solicitor.

(6) **NO BONDS REQUIRED**—In administrations bonds are required by the Court from individuals. In no case does the Corporation have to furnish security where it is employed.

THE ROYAL MILITARY COLLEGE

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact, it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and, in addition, there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control, and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Seven commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from $750 to $800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Adjutant General of Militia, Ottawa, Ont.

Explanation of the Articles in the Calendar.

Standard times* are given in all columns headed Toronto, Quebec, and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 13th.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The column, TRANSIT OF FIRST POINT OF ARIES, shows for every day the mean time* at which the FIRST POINT OF ARIES passes the meridian of longitude 4h. 46m. W. (71° 30′), and for any other meridian a correction of 0.655 secs. per degree will have to be applied, minus for longitudes west of the 71° 30′, and plus for east. This column is put in especially to be used in connection with the Tables for Time and Azimuth of Polaris when vertical with certain other stars.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.)

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 48′ 8″. The maximum error in the use of this Table will not exceed 5 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

*In the present Almanac the hours are numbered from 0 (midnight) to 23.

†Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

Star Table.

From the times of the transit of the *First Point of Aries* may be derived, with the aid of the following table, the approximate times of culmination, in the Vertical of Polaris, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the transit of the *First Point of Aries* for the given day in the calendar. If the result exceeds 24 hours, *subtract* 23h. 56m. To find when a star is in the *Vertical of Polaris* proceed as described for meridian passage, using the figures in the middle column instead of the first column.

To find the time of *rising* of a star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. The stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Example.—Find the time of *culmination* in the *Vertical of Polaris*, and rising and setting of α Aquilæ (Altair) September 23rd, 1905.

Eclipses, 1905. (By F. L. Blake).

In the year 1905 there will be four eclipses, two of the sun and two of the moon:

I.—A partial eclipse of the moon, 1905, February 19th. Invisible in Canada.

II.—An annular eclipse of the sun, 1905, March 5th. Invisible in Canada.

III.—A partial eclipse of the moon, 1905, August 14th, visible in Toronto, the beginning visible generally in North and South America, Europe, and Africa; and the ending generally throughout the whole of North and South America, and the extreme western portion of Africa.

Magnitude of the eclipse = 0·292 (Moon's diameter = 1·0).

IV.—A total eclipse of the sun, 1905, August 29–30, visible in Canada east of the 110th Meridian The central line of the path of the shadow begins generally in Long. 96° 23′ W., and Lat. 50° 15′ N., being a little S.E. of Winnipeg. Passing thence easterly inclining to north it crosses James Bay and strikes the Atlantic Ocean at Domino Harbor, Labrador. Thence sweeping across the ocean with tremendous velocity it reaches in 1*h.* 6*m.* a point south of Luarca in Spain. Crossing the northern part of Spain the Mediterranean Sea is reached in 16*m.*, and Assouan, Egypt, on the Red Sea, in 1*h.* 5*m.* later. The shadow then crosses the Red Sea and the deserts of Arabia, finally ending near the Arabian Sea.

The eclipse will be partial at *Toronto*, beginning at 5 39 a.m. sunrise, August 30th (75th Mer. time). The maximum occurring at 6.34 a.m., ending at 7.34 a.m. The magnitude of the eclipse being 0·774 (sun's dia. 1·0). At *Ottawa* the eclipse begins 5.41 a.m., maximum at 6.36 a.m., and ending 7.38 a.m., the magnitude being 0·846.

At *Domino Harbor, Labrador*, the eclipse begins at 6.51 a.m. (60th mer. time). Totality begins 7*h.* 54*m.* 10*s.*, lasting 2*m.* 38*s.* The eclipse ends 9.4 a.m.

At *Montreal* the eclipse begins at 5.40 a.m. Maximum 6.38 a.m. and ending 7.40 a.m., the magnitude being 0·811.

AZIMUTH OF "POLARIS" LOCAL MEAN TIME, AND SIDEREAL TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

These Tables are for finding the *Azimuth* of *Polaris* and the *Local Mean Time* (not Standard time) when in the same *Vertical Circle* with certain bright stars to be observed during the evening between sunset and midnight.

The arrangement of the tables has been considerably altered from that of last year. Six stars have been seleoted suitable for TIME purposes, namely, β Oaionis *(Rigel)*, α Leonis *(Altair)* α Viroinis *(Spica)*, α Serpentis, α Aquilæ *(Altair)* and α Aquarii. The remaining fourteen stars are for *azimuth* and *sidereal time* only.

To obtain the *Azimuth of Polaris* a certain logarithm is tabulated called Log. B., and is to be used in the following azimuth formulæ: Cotang. Az. = Cos. Lat. B.

The azimuth thus obtained will have to be corrected for time interval between the sighting on *Polaris* and the passage of the Star across thc vertical line. This correction is obtained by multiplying the seconds of time interval by the decimal in column *a*.

The *Local Mean Time* is obtained by using the column under the heading MEAN TIME in conjunction with the *Transit* of the *First Point* of *Aries* over the meridian of longitude, $4^h\ 46^m$ or 71° 30′ W., and for any other meridian the tabulated *Transit* of *First Point* of *Aries* should receive a correction of 0.655 secs. for each degree of longitude differing from 71° 30′. *Subtractive* when the plaoe of observation is *West* and additive *East*.

A method of taking the observation would be as follows: A short time before the *Local Mean Time* of passage of the selected Star (this time should be obtained from the Star table given on page 14) have the instrument set up, well levelled and the collimation error reduced to zero. Sight on *Polaris*, clamp the azimuth plate and turn the telescope over to the other star and wait till it appears in the field of view. Then turn back again to *Polaris* and bisect accurately by means of the tangent screw, note the time and again turn over to the other Star and take the time of its passage over the wires.

Either before or after this observation the *Latitude* may be very easily obtained from the Latitude Tables which follow by sighting on *Polaris*, noting the time and reading the altitude circle.

By means of these tables the *Time*, *Latitude* and *Azimuth* of *Polaris* may be obtained in a very short time.

An additional column has been added to each star giving the SIDEREAL TIME.

EXPLANATION OF TABLES.

The column *a*, Decimals of a second in *Azimuth* for each second of time interval.
" *t*, " " " in *Time* " " "
" MEAN TIME. The time to be applied to the *Transit* of the *First Point* of *Aries* for the day of observation to obtain the true *Local Mean Time*.
" SIDEREAL TIME. The sidereal time when the star is in the *Vertical* of *Polaris*.
" Log. B. The logarithms used in obtaining the *Azimuth* of *Polaris*.

The *Transit* of the *First Point* of *Aries* will be found in the calendar tabulated for every day of the year for longitude 71° 30′ W. The elevation of the stars are given to identify them. The altitudes are for latitude 42°.

EXAMPLE.

Suppose that in latitude 48° 30′ and longitude 80° 32′ by account on September 25th, 1905, *Polaris* was observed at watch time $19^h\ 37^m\ 6^s$ and α Aquilæ *(Altair)* in the same vertical at $19^h\ 40^m\ 6^s$, giving a time interval of 180 seconds. Required the watch error and Azimuth of Polaris.

FIRST TO FIND THE WATCH ERROR.

To find *Transit* of *First Point* of *Aries* over 80° 32′ longitude.

AZIMUTH OF POLARIS.

Log. Cotang. Az. = Log. Cosine Lat. + Log. B. for date.

Log. B. for Sept. 25th, 1905	= 1.68045
Log. Cos. Lat. 48° 30′	= 9.82126
Log. Cotang. Az.	= 1.50171
Az.	= 1° 48′ 15″ East.
Time interval correction 180 secs. × .04	= + 7
Corrected Azimuth	= 1° 48′ 22″ East.

2nd Example.—Suppose on June 14th, 1905, Polaris was observed at $13^h\ 55^m\ 22^s$, sidereal watch and α Bootis *(Arcturus)* in the same vertical at $13^h\ 59^m\ 2^s$ in Latitude 48° 10′. Required the watch error and Azimuth of Polaris. Time interval 220 secs.

	h.	m.	s.
SIDEREAL TIME from Tables (Lat. 48° 10′)	= 14	12	5
Time interval correction 220 secs. × .016	= − 0	0	4
Corrected sidereal time	= 14	12	1
Watch time	= 13	59	2
Watch slow	=	12	59
Log. B. for June 14th 1905	=	2.37544	
Log. Cosine Lat. 48° 10′	=	9.82410	
Log. Cotang. Az.	=	2.19954	
Az.	=	0° 21′ 43″	
Time interval correction 220 secs. × .46	=	− 1 41	
Corrected Azimuth	=	0. 20. 2 East.	

Note.—In taking these observations for Azimuth the true time is not necessary, only the time interval being required, which for all practical purposes may bo obtained by any ordinary watch.

STARS IN THE "VERTICAL OF POLARIS," 1905.

For ascertaining the *Local Mean Time, The Sidereal Time* and *Azimuth of Polaris.* To find the *Azimuth of Polaris* add together the tabulated Log. B. and the Log. Cosine of the latitude. The result is the Log. Cotangent of the Azimuth. If there is a *Time Interval* between the observation on *Polaris* and the star selected the correction in Column *a* will have to be multiplied by the *Time Interval* in seconds and applied. Column *a* contains the change in azimuth for one second of time. Column *t* contains the change in *Time* of the *Time* star in one second.

TABLES FOR "LATITUDE" BY AN OBSERVED "ALTITUDE OF POLARIS" AT ANY TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

Note the watch time when *Polaris* is observed and correct for watch error.
Reduce the *Observed Altitude* to the *True Altitude* by correcting for index error and refraction.
Next take the *difference* between the *True* watch time and the Almanac time of the *Upper Transit of Polaris* for the given day. (This Almanac time will have to be corrected for any other longitude than 71° 30′ for which it is tabulated by *Adding* 0.655 secs. for every degree *East* and *Subtracting* when the place of observation is *West* of 71° 30′.)
Call this *difference* the *Hour Angle*.

Table I.—With this *Hour Angle* and the *True Altitude* enter Table I. and apply the correction to the *True Altitude* always *additive*.

Table II.—Enter Table II. with the *Hour Angle* and apply the correction with its proper sign.

Table III.—Enter Table III. with the *Date* and *Hour Angle* and apply the correction with the same *sign* as used in Table II.

The result is the *Latitude*.

EXAMPLE.

1905, September 14th at 21h 25m mean time by watch which is 33s fast in longitude 85° 30′ by account suppose the *True Altitude* of *Polaris* to be observed 43° 30′. Required the Latitude.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the *tabular refraction*, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become *subtractive*. When great accuracy is required, 0·003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

THE LAKE ST. JOHN TERRITORY.

This territory, extending northwards to the boundary of the Province of Quebec, and westward to the River St. Maurice, embraces the valley of the Batiscan and the field of lumbering operations on the Saguenay and St. Maurice, estimated at 60,000,000 feet, B.M., per annum, or one-fourth of Quebec's entire export of sawn lumber. Of this area of 44,000 square miles or 28,000,000 acres, comparatively little is known outside of the valley of Lake St. John, where colonization is making rapid progress, and there is a population of 49,765 souls.

The Soil, says a visitor, "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointeaux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain was as fine as any to be found in this district.

"**The climate of the Lake St. John region** is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less." Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

	1871.	1881.	1891.	1901.		1871.	1881.	1891.	1901.
Grains	324,558	521,013	532,397	1,532,075	Butter, pounds..	148,106	393,127	430,812	444,012
Potatoes, bushels	156,996	287,238	306,570	457,845	Head of live stock	44,772	59,795	117,602	114,100
Hay, tons	5,966	16,347	32,711	48,273	Population	17,493	32,409	38,281	49,765

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate. Let us then compare its production at Lake St. John with the best districts of the Province, viz: the Eastern Townships, and we find that the census returns show in 1881:—

	Population.	Bush. Wheat.	Bush. per 1000 of pop.
Chicoutimi	32,409	154,589	4,800
Compton	19,581	34,181	1,800
Stanstead	15,556	37,727	2,400
Huntingdon	15,495	24,378	1,600

The official reports of the Meteorological Department at Toronto show the average temperature of Roberval to be 35.9 for the year, 12.2 for the winter and 59.7 in summer—as compared with 31.8, 1.4, and 57.1 respectively at Chicoutimi; 37.0, 8.7, and 60.3 at Quebec; 39.2, 10.4, and 62.5 at Montreal, and 31.2, 3.4, and 57.6 at Moose Factory. The average winter snow-fall is 43.5 inches at Roberval, 36.1 at Chicoutimi, 94 at Quebec, 94.1 at Montreal, and 33.6 at Moose Factory.

Careful surveys of the country intervening between Lake St. John and James Bay prove that the engineering difficulties to be surmounted in extending the railway from its present northern terminus at Roberval to the southern extremity of James Bay, which it is intended to do, are very much less than those encountered in building the Quebec and Lake St. John Railway. This link of railway between Lake St. John and James Bay will be an important section of the projected Trans-Canada road. The James Bay section of this road will not only bring to Lake St. John, Chicoutimi, and Quebec the products of the fisheries and mines of the James and Hudson Bay regions, but by its extension through the rich townships to the north-west of Roberval will give additional means of communication and add value to the fertile lands of Ashuapmouchouan, Demeules and Dufferin townships and the villages of St. Prime and St. Félicien, as well as all the neighboring townships.

From La Tuque Junction, 78 miles from Quebec, a branch line 40 miles long is now under construction, to be completed in December, 1905, to La Tuque, at the head of steamboat navigation on the St. Maurice, the centre of enormous lumbering operations, employing nearly 7,000 men, and possessing a magnificent water power twice the capacity of that which has built up a large town at Grand Mere. This branch will open up 12,000 square miles of timber limits, and much valuable agricultural lands, as well as a delightful round trip for tourists by rail and steamer, the latter for 70 miles down the St. Maurice, amid the most charming scenery.

TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1905

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal and Current Survey, in the Department of Marine and Fisheries of the Dominion of Canada. They are based upon observations obtained by means of self-registering tide-gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac office, London.

The Tide Tables for Halifax are based upon the analysis of a tidal record which was obtained during the years 1851, 1852, 1860 and 1861, together with the record from the present tide-gauge during four complete years; from October 1895 to January 1900. The Tide Tables for Quebec are based upon tidal record during six complete years, between November 1893, and March 1900. The Tide Tables for Father Point are based upon tidal record during four complete years; from January 1897 to April 1901. The Tide Tables for St. John, N.B., are based upon tidal record during four complete years; from April 1894 to May 1898.

The TIME used is Atlantic Standard, for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide, *add* 23·4 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Halifax, are given on page 47.

The Time used is Eastern Standard, for the 75th Meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Quebec Harbor.

Levis Dry Dock.—To find the depth of water on the sill of this dock at any tide, *add* 7·7 feet to the height of High Water as above given. The Tidal Differences referred to Quebec, are given on page 47.

The TIME used is Eastern Standard for the 75th Meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Quebec Harbor.

LEVIS DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 7·7 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Quebec, are given on page 47.

The TIME used is Atlantic Standard for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides, as ascertained by the tide gauge observations themselves. (This level is approximately 1½ feet lower than the Datum to which the soundings on the Chart of St. John Harbor are referred, as nearly as this can now be ascertained.)

TIDAL DIFFERENCES throughout the Bay of Fundy are given on page 47.

The TIME used is Atlantic Standard for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides as ascertained by the tide gauge observations themselves. (This level is approximately 1½ feet lower than the Datum to which the soundings on the Chart of St. John Harbor are referred, as nearly as this can now be ascertained.)

TIDAL DIFFERENCES and other information for the Bay of Fundy, are given on page 47.

LEGAL WEIGHTS AND MEASURES IN CANADA.

The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon (of 277·27384 cubic inches), and the Imperial bushel. The Imperial gallon is equal to 4·54174 litres, while the wine gallon, used in the United States, is equal to 3·785 litres.

By Act 42nd Vic. (1879), Chap. 16 (amended by Chap. 30, Acts of 1898), it is provided: That in contracts for sale and delivery of any of the undermentioned articles, the bushel should be determined by weighing, unless a bushel measure be specially agreed upon, the weight equivalent to a bushel being as follows :—

Wheat, 60 lbs. Indian Corn, 56 lbs. Rye, 56 lbs. Pease, 60 lbs. Barley, 48 lbs. Malt, 36 lbs. Oats, 34 lbs. Beans, 60 lbs. Flax seed*, 56 lbs. Hemp, 44 lbs. Blue grass seed, 14 lbs. Lime†, 80 lbs. Castor beans, 40 lbs. Potatoes, 60 lbs. Turnips, 60 lbs. Carrots, 60 lbs. Parsnips, 60 lbs. Beets, 60 lbs. Onions†, 50 lbs. Bituminous coal, 70 lbs. Clover seed, 60 lbs. Timothy, 48 lbs. Buckwheat, 48 lbs.

By the same Act the British hundredweight of 112 pounds and the ton of 2,240 pounds were abolished, and the hundredweight was declared to be 100 pounds, and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

*Changed from 50 to 56 lbs. by Act of Parliament, 1898.
†Changed from 60 to 50 lbs. by Act of Parliament, 1898.

DUMPING CLAUSE.

Whenever it appears to the satisfaction of the Minister of Customs, or of any officer of Customs authorized to collect Customs duties, that the export price or the actual selling price to the importer in Canada of any imported dutiable article, of a class or kind made or produced in Canada, is less than the fair market value thereof, as determined according to the hasis of value for duty provided in *The Customs Act* in respect of imported goods subject to an ad valorem duty, such article shall, in addition to the duty otherwise established, be subject to a special duty of Customs equal to the difference between such fair market value and such selling price: Provided, however, that the special Customs duty on any article shall not exceed one-half of the Customs duty otherwise established in respect of the article, except in regard to the articles mentioned in items 224, 226, 228 and 231 in Schedule A to *The Customs Tariff*, 1897, the special duty of Customs on which shall not exceed 15 per cent. ad valorem, nor more than the difference between the selling price and the fair market value of the article.

The expression "export price" or "selling price" in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to Canada.

This section shall apply to imported round rolled wire rods not over three-eighths of an inch in diameter, notwithstanding that such rods are on the Customs free list: Provided, however, that the special duty of Customs upon such wire rods shall not exceed 15 per cent. ad valorem.

If at any time it appears to the satisfaction of the Governor-in-Council, on a report from the Minister of Customs, that the payment of the special duty hy this section provided for is being evaded by the shipment of goods on consignment without sale prior to such shipment, the Governor-in-Council may in any case or class of cases authorize such action as is deemed necessary to collect on such goods or any of them the same special duty as if the goods had heen sold to an importer in Canada prior to their shipment to Canada.

If the full amount of any special duty of Customs is not paid on goods imported, the Customs entry thereof shall he amended and the deficiency paid upon the demand of the collector of Customs.

The Minister of Customs may make such regulations as are deemed necessary for carrying out the provisions of this section and for the enforcement thereof.

Such regulations may provide for the temporary exemption from special duty of any article or class of articles, when it is established to the satisfaction of the Minister of Customs that such articles are not made in Canada in substantial quantities and offered for sale to all purchasers on equal terms.

Such regulations may also provide for the exemption from special duty of any article whereon the duty in Schedule A is equal to 50 per cent. ad valorem or upwards, or when the difference between the fair market value of the goods and the selling price thereof to the importer as aforesaid amounts only to a small percentage of their fair market value.

This section shall not apply to goods of a class subject to excise duty in Canada.

SPECIAL CUSTOMS DUTY.

In making Customs Entry the "special duty" may be shown by itself in the "net duty" column of the entry on the line below the article subject to special duty, or on the line below continuous numbers of articles subject to special duty.

Goods of a *class* or kind made in Canada are subject to special duty when sold for exportation to Canada at a less price than for home consumption in the Country of export.

The "special duty" is applicable to goods which are subject to specific duties as well as to goods subject to ad valorem duties on importation into Canada, and also to round rolled wire rods not over three-eighths of an inch in diameter.

The following articles are subject to a special duty equal to the difference between the "selling price" and the "fair market value," but not exceeding 15 per cent. ad valorem in any case, viz.:—

(Item 224.) Pig Iron, Iron Kentledge and Cast Scrap Iron.

(Item 226.) Steel Ingots, cogged ingots, blooms, slabs, billets, puddled bars and loops or other forms, n.o.p., less finished than bars.

(Item 228.) Rolled iron or steel angles and other structural shapes, etc., weighing not less than thirty-five pounds per lineal yard.

(Item 231.) Rolled iron or steel plates not less than thirty inches wide and not less than one-quarter of an inch thick (n.o.p.)

By the regulations (in force only from this date) under sub-section 8 of the special duty clause (except as otherwise decided in specified cases), the special duty is not to apply when the difference between the fair market value and the selling price of the goods to the importer in Canada does not exceed five per cent. of their fair market value—the whole difference, however, when exceeding five per cent., to be taken into account in cases where special duty is applicable.

Goods subject to a duty equal to 50 per cent. ad valorem under the General Tariff are by regulation exempt from "special duties" from this date (10th August, 1904).

Square, Surface, or Land Measure.

The square foot contains 144 square inches.
Yard = 9 feet = 1,296 inches.
Rod, pole, or perch = 30¼ yards = 272½ feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 yards = 1,210 yards = 10,890 feet.
Acre = 4 roods = 160 rods = 4,840 yards.
Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.

An acre *roughly* stated has four equal sides of 69½ yards; *accurate* measurement gives each side 208.71 feet.

The sides of a square half-acre would be 147.581 feet, and of a square quarter-acre 104,355 feet.

Measures of Time.

60 seconds = 1 minute.
60 minutes = 1 hour.
24 hours = 1 day.
23*h.* 56*m.* 4*s* = 1 sidereal day.
7 days = 1 week.
28 days = 1 lunar month.
28, 29, 30, or 31 days = 1 calendar month.

365¼ days = 1 common year.
366 days = 1 leap year.
365*d.* 5*h.* 48*m.* 46*s.* = 1 tropical year.

The astronomical day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are leap years and 303 common, leap year being omitted every 100 year, but *not* omitted every 400th. (1900 was not a leap year.)

Angular Measure.

60 seconds″ = 1 minute.
60 minutes′ = 1 degree.
30 degrees° = 1 sign.
90 degrees° = 1 quadrant.
4 quadrants, or 360° = 1 circumference or circle.

The earth rotates at a velocity of 15 degrees an hour (about 17.366 miles a minute at the equator); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of a circle × 3.1416 gives circumference.
Diameter squared × .7854 gives area of circle.
Diameter squared × 3.1416 gives surface of sphere.
Diameter cubed × .5236 gives solidity of sphere.
One degree of circumference × 57.3 gives radius.
Diameter of cylinder × 3.1416, and product by its length, gives the surface.
Diameter squared × .7854, and product by the length, gives solid contents.

A circular acre is 235.504 feet, a circular rood 117.752 feet in diameter. The circumference of the globe is about 24,855 miles, and the diameter about 7,900 miles.

Electrical Measures.

	For the Measure of
Volt	Electromotive force = about 92.6% of that given by one Daniell's battery cell.
Ohm	Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.
Ampere	Current = the current 1 volt will drive through 1 ohm.

35.943 cubic ft. (210 gals.) = 1 ton (Eng.)

The gallon is = 277¼ cubic inches = 0.16 cubic feet = 10 lbs. distilled water.

Cisterns: 1 cubic foot is equal to about 6¼ gallons, or 62.321 lbs. A cistern 4 feet by 2½ and 3 deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight.

A cubic foot of pure gold weighs 1,210 lbs., pure silver 655 lbs., cast iron 450 lbs., copper 550 lbs., lead 710 lbs., pure platinum 1,220 lbs., tin 456 lbs., aluminium 163 lbs.

METRICAL WEIGHTS AND MEASURES.

The French metrical system is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin :—

REIONINO KINO AND EMPEROR OF INDIA.—Edward VII.

EXECUTIVE POWER.

A sovereign, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—*i.e.*, by the crown, lords and commons. The head of the administration is the premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of eighteen ministers; the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of Great Britain, including the chief officials for Scotland and Ireland, is forty-eight. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.

The parliament of Great Britain is composed of the crown, lords, and commons. The house of lords consists at present of 592—archbishops (2), bishops (24) and peers, the latter divided into dukes, marquesses, earls, viscounts and barons. Four princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 26 representative peers elected for life. The speaker is the lord high chancellor of Great Britain, who is a member of the cabinet, and retires with a change of government. The house of lords has coordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be British citizens of the age of 21 years, not bankrupts, nor idiots nor criminals. Members are not paid. The system of local government has been much simplified of late years. England and Wales are now divided into 62 administrative counties, including the city of London. In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local goverment, and the duties formerly performed by "vestries" are now discharged by "parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratepayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland in some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

BRITISH COLONIES AND DEPENDENCIES, viz.:

Aden, a British protectorate and fortified station; estimated population, 42,000, mostly Bedouins; area, 75 square miles.

PERIM, a dependency of Aden, has five square miles, and a population of 2,000.

EXECUTIVE POWER.—Under the lieutenant-governor and council of Bombay, who are represented by a president or political resident, who is the commandant of the British troops in the peninsula.

Andaman and Nicobar Islands, a penal settlement in the Bay of Bengal; estimated population, 24,500; area, 2,635 square miles. In 1903 there were 12,723 convicts in the settlement, including 715 women.

EXECUTIVE POWER.—Subject to government of Bengal (see India, p. 111). A chief commissioner and superintendent are appointed by the Indian government.

Ascension Island, a naval station; area, 35 square miles; population, about 500.

EXECUTIVE POWER.—This rocky island is under the control of the British Admiralty.

Australia, Commonwealth of, a federal dependency with representative and responsible government; population (1901), 3,771,715; area, 2,972,573: see statistics given below for New South Wales (p. 113), Tasmania (p. 114), South Australia (p. 114), Western Australia (p. 115), Queensland (p. 113), and Victoria (p. 114), which form the new federation proclaimed in 1901, under the Imperial Act passed in 1900, in accordance with the vote of the people of these several dependencies.

EXECUTIVE POWER.—The king represented by a governor-general, appointed by the crown, and advised by an executive council, consisting at first of seven members. The government holds office as long as it has the confidence of the people, as expressed by their representatives in parliament. The principles of English parliamentary government prevail in the commonwealth and states of the federation. The common and criminal law of England obtains in all the states. The judicature consists of a federal high court, and such other federal courts as the parliament of the commonwealth may establish. The justices of these courts are appointed by the

*Revised and corrected from latest available authorities.

governor-general-in-council, and hold office during good behaviour. The high court is a court of appeal from the courts of the states. Appeals may be made from its decisions to the Privy Council of Great Britain under limitations. The state courts remain under the sole jurisdiction of the state governments, and appeal can be made direct to the king-in-council, as heretofore, under certain restrictions.

LEGISLATIVE POWER.—The king, senate and house of representatives. The senators are elected by the people of the states for six years. Each state has an equal representation of six members, and half the number of senators shall retire every three years, but are eligible for re-election. The franchise for the election of a senator is the same as that for the popular body at the time of the union. The president is elected by the senate. The place of a senator becomes vacant if he is absent for two consecutive months of a session. The house of representatives consists, as near as possible, of twice the number of senators, but no state shall have a smaller representation than five members. The first house of representatives consisted of 75 members as follows:—New South Wales, 26, Victoria, 23, Queensland, 9, South Australia, 7, Tasmania, 5, and Western Australia, 5. Members are elected for three years. The speaker is elected by the house. Members of each house receive £400 each as a sessional indemnity. Bills appropriating revenue or moneys, or imposing taxation shall only originate in the house of representatives. As in Canada and England by practice, the senate may not amend bills imposing taxation or appropriating revenue or moneys for ordinary annual services of the government. But the senate may at any stage return to the lower house a bill requesting the amendment of any items or provisions therein, and the house may accept or reject such proposals. In case of a deadlock a dissolution takes place, and afterwards a joint sitting at which a majority of votes decide the fate of the disputed measure. The federal parliament has power to alter the franchise on which its members are elected, but it cannot diminish the voting powers of the people, or withdraw the right of women to vote as long as adult suffrage obtains in any states. The legislative powers of the federal parliament are alone enumerated, and all other powers rest with the state parliaments. In the event of a federal law conflicting with an existing state law, the federal law shall prevail. The federal government has the administration of the departments of customs and excise, which form the chief sources of federal revenue, but of the net revenue from such duties not more than one-fourth shall be applied annually by the commonwealth towards its expenditure, and the balance shall be paid to the several states or applied towards the payment of interest on debts of the several states taken over by the federal government. Uniform duties of customs must be imposed within two years after the establishment of the commonwealth. The king may disallow any federal law within one year from the governor-general's assent.

EXECUTIVE POWER.—The united kingdoms are under the king of Sweden (Oscar II), now a hereditary sovereign, though each kingdom maintains its separate government and laws. The diets of the two countries are to choose a successor to the throne in case of a failure of regular succession; and should they not agree on a suitable person, the choice is made by Swedish and Norwegian deputies. The common affairs of the united kingdoms are considered by the king, with the assistance of a council of state, composed of Swedish and Norwegian ministers.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—1. In Sweden there is a council of state of 11 members; a diet or parliament of two houses; an upper or first house of 150 members elected by provinces and town corporations for nine years; a lower or second chamber of 230 members, elected by residents of rural districts and towns for three years on a franchise based on property and income. Members of the second chamber are alone paid. The ballot is in use.

2. In Norway there is a council of state to advise the king, and a storthing, or great court, of 117 members elected for three years on a franchise based on property and income, or public service. The system of election is indirect. The people elect certain deputies every three years, these latter assemble and choose the representatives to the storthing. The storthing, when elected and assembled for business, is divided into two houses, the "lagthing," or one-fourth of the storthing, and the "odelsthing" or remaining three-fourths of the storthing. The odelsthing has the whole right to inspect and consider public accounts. All new laws are initiated in the lower house, and are accepted or rejected by the lagthing. If the two houses do not agree, they assemble in joint session, and a majority of two-thirds decide. Members are paid.

3. A system of local government exists in both Norway and Sweden, and the representative principle prevails to a modified extent.

The federal assembly elects president and vice-president one year and a bundesrath or federal council for three years. Members of the council can sit and debate but not vote in the two chambers. President, 1904, R. Comtesse.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The principles of initiating measures by popular vote (the initiative), and of submitting acts to direct vote (the "referendum") are in force in this republic. The legislative powers of the nation are set forth in the constitution. Each of the cantons has a system of local government based on the fullest possible expression of the popular will. Legislative assemblies and executive councils exist, and in a few cantons there are landsgemeinden or assemblies of the male citizens for the purpose of making laws and appointing their administrators. The "initiative" and "referendum" also exist to a considerable extent. The cantons or states are sovereign and only limited by the constitution.

Legislative Power and Local Government.—The khedive has promulgated a constitution intended to give the people a share in legislation, but so far it is practically nugatory. Egypt is divided into governorships of towns and provinces with extensive powers, but all under the control of the khedive and executive.

United States of America, federal republic; population in census year 1900, 76,303,387, including Alaska and Hawaii; area, 3,566,104 square miles.

EXECUTIVE POWER.—President, elected for four years under the constitution by electoral colleges in each state equal to the whole number of its senators and representatives in congress; but practically the election is by the direct vote of the people. Each political party nominates a set of electors on a presidential ticket and the people vote directly for them. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds. [On the assassination of President McKinley, Vice-President Roosevelt succeeded on 14th September, 1901.] If there is no vice-president the secretary of state or other members of cabinet succeed in order of seniority until a new president is appointed or the disability is removed. Elections for president and vice-president take place on the Tuesday following the first Monday in November every fourth (leap) year, and they take office on the 4th March following.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—Congress of two houses; a senate of 90 members, or two from each state, chosen by the legislatures for six years; a house of 386 representatives elected every second year by the electors of the states in accordance with their respective election laws; universal suffrage limited in a few cases by residence, educational tests, registration and payment of taxes. Senators must be 30 years of age, citizens for nine years, and residents of the states which elect them. Representatives must be about 25 years of age, citizens for seven years, and residents of the states in which they are elected. The senate has the power of approving or rejecting the higher appointments and treaties made by the president, and of acting as a court of impeachment for the president, judges of the supreme court, and other high functionaries. It can also amend bills for raising revenue, which alone can originate in the house of representatives. The vice-president is *ex-officio* president of the senate, which may also appoint a temporary president. The speaker of the house is elected by its members. Members of both houses receive $5,000 and travelling expenses every year. The territories are represented by one elected delegate in each case, who cannot vote in the house. The legislative powers of the congress are enumerated in the constitution. The supreme court of the United States can hear and determine issues of laws as to the interpretation of the constitution and may declare the acts of congress unconstitutional or *intra vires*, as the case may be. The federal judges are appointed by the president with the approval of the senate. A permanent civil service is being gradually built up, and removals from office in the case of officials, not political in their nature, are very much less frequent of late years with the extension of civil service rules to all departments.

Executive Power.—In each state there is a governor and a lieutenant-governor and officers to administer the government. The governor and lieutenant-governor are elected by the people for four years in following states: California, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, North Carolina, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wyoming. In the following states the term is three years: New Jersey and New York. In the following, two years: Alabama, Arkansas, Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Vermont, Wisconsin. In the following, the term is one year: Connecticut, Maine, Massachusetts and Rhode Island. All the governors have the power of veto over legislation except in Delaware, North Carolina, Ohio, Rhode Island. It requires a majority or two-thirds vote to over-ride the veto. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

Legislative Power and Local Government.—In all the forty-nine states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia, Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Idaho, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to confirmation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are practically effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for municipal and school bodies. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

His Royal Highness Leopold George Duncan Albert, Duke of Albany, born April 7, 1853; married April 27, 1882, to Princess Helen of Waldeck, and died March 28, 1884, having had issue one son, now Duke of Albany, who succeeded his uncle, the Duke of Edinburgh, as Duke of Saxe-Coburg-Gotha, on July 30, 1900, and one daughter.

THE KING'S CIVIL LIST.

Consequent upon the death of Her Majesty Queen Victoria, and the accession of His Majesty Edward VII., there was passed in the Parliamentary session of 1901 what is known as the Civil List Act, the Act by which is determined what charges shall be made on the consolidated fund for the maintenance of the King and his family.

Until George III. came to the throne in 1760, the income of the sovereign was derived chiefly from Crown lands, from a variety of landed property in England and Wales, Scotland and Ireland, in which the sovereign had a life-interest, and from which he received the rents. In the feudal ages these lands constituted a princely patrimony. In later times this Crown property was greatly reduced by lavish grants to royal favorites. At the Restoration the income from Crown lands was ascertained by a committee of the House of Commons to amount to £217,900 a year, in addition to £4,000 from the Forest of Dean. By the time Charles II. had been on the throne three years he had by his lavish bestowal

of the lands on favorites reduced the Income to £100,000. William III., by his grants to favorites who had accompanied him from Holland, made further havoo with the Crown domains; so much so that at the accession of Queen Anne Parliament endeavored to save the remnant by an Act (1 Anne, c. 8) which prohibited alienation of Crown lands, and enacted stringent provisions in regard to the length of the term for which they might be leased and the rents reserved.

Queen Anne, George I. and George II. derived the larger part of their income from their life-interest in the Crown property, but when George III. came to the throne he surrendered his life-interest in the Crowu lands. It was turned over to the nation in return for a fixed Civil List of £800,000, subsequently increased to £900,000. George IV., William IV. and Queen Victoria, on their accessions, surrendered their life-interest in the Crown lands in return for a Civil List. The same course was taken by Edward VII. when he came to the throne; and soon after Parliament assembled a committee of the House of Commons was appointed to recommend the new Civil List. It reported on the 4th of April, 1901, and its recommendations were embodied in an Act (1 Edward VII., c. 4), which was read a third time in the House of Commons on June 18th. By this Act the King's Civil List was fixed at a yearly sum of £470,000, assigned as follows:

CLASSES OF EXPENDITURE.	SUM APPROPRIATED.
I. Their Majesties' Privy Purse	£110,000
II. Salaries of His Majesty's household and retired allowances	125,800
III. Expenses of His Majesty's household	193,000
IV. Works	20,000
V. Royal bounty, alms and special services	13,200
VI. Unappropriated	8,000
Total	£470,000

In the event of Her Majesty Queen Alexandra surviving the King it is enacted that there shall be paid to the Queen during her life an annuity of £70,000.

Another clause provides that there shall be paid to the Duke of Cornwall and York "during the joint lives of his present Majesty and of his said Royal Highness, an annuity of £20,000"; that "there shall be paid to the Duchess of Cornwall and York during the continuance of her marriage with the Duke of Cornwall and York, for her sole and separate use, but without any power of anticipation, an annuity of £10,000; and that in the event of the Duchess surviving the Duke there shall be paid to her during her life an annuity of £30,000."

In respect to His Majesty's daughters, Princess Louise (Duchess of Fife), Princess Victoria and Princess Maud (Princess Charles of Denmark), it is enacted that as a provision for them there shall be an annual allowance of £18,000 during their joint lives, "to be reduced at the death of each of the said princesses by £6,000."

The Civil List of Her late Majesty, Queen Victoria, as fixed by the Act of 1837, was £385,000, assigned as follows:

Her Majesty's Privy Purse	£ 60,000
Salaries of Household	131,260
Expenses of Household	172,500
Royal Bounty, etc	13,200
Unappropriated	8,040

At the death of the Queen, the allowances to Her Majesty, to the Prince and the Princess of Wales, and in respect to the Prince of Wales's children, aggregated £471,000, The details of these payments were:

Her Majesty's Civil List	£385,000
The Prince of Wales (26 Vict., c. 1)	40,000
The Princess of Wales (26 Vict., c. 1)	10,000
Annuity, Prince of Wales's children (52-3 Vict., c. 35)	36,000

Until the death of the Empress Frederick of Germany, on August 5th, 1901, annuities amounting to £72,000 were payable to other members of the Royal Family. These annuities were not affected by the death of the Queen, but with the death of the Empress an annuity of £8,000 came to an end.

The annuities to the Royal Family after the resettlement at the accession of Edward VII. stand thus:

His Majesty (Civil List)	£470,000
Duke of Cornwall and York	20,000
Duchess of York	10,000
Princesses Louise, Victoria and Maud	18,000
Princess Christian of Schleswig-Holstein	6,000
Princess Louise, Duchess of Argyll	6,000
Duke of Connaught	25,000
Princess Beatrice (of Battenburg)	6,000
Duchess of Mecklinburg-Strelitz	3,000
Duke of Cambridge	12,000
Duchess of Albany	6,000
Total	£582,000

The revenues of the Duchies of Cornwall and Lancaster are outside the Civil List arrangement. Those of Cornwall, valued at £60,000 a year, are vested in the eldest son of the reigning sovereign, who becomes by birth the Duke of Cornwall, by virtue of a patent of Edward III. in 1337. The Duchy of Lancaster was the private patrimony of Henry Bolingbroke, son of John of Gaunt. It is separate from the other possessions of the Crown in order and government, but united to it in point of inheritance. It also brings in a revenue of £60,000 a year.

THE BRITISH ARMY IN 1904.

In ordinary years the House of Commons adopts the estimates of the War office, settling the strength of the Army for the ensuing twelve months, and the matter is at an end. But 1904 was not an ordinary year in the history of the Army. A Royal Commission was appointed in 1903 to report on the Militia and the Volunteers; and a Committee was also appointed to report on the organization of the War Office. Both reported during the Parliamentary session of 1904. The Royal Commission reported in favor of conscription; the Committee recommended certain changes in the organization of the War Office; and, in consequence of these reports, the Army was more under discussion in the session of 1904 than at any time during peace for ten or fifteen years past.

The Army Estimates came before the House of Commons in the ordinary way on the 7th of March, when Mr. Arnold-Forster made his annual statement to the House as Secretary of State for War. The estimates called for a vote for 227,000 men, a decrease of 8,761 as compared with the number voted by Parliament for the year 1903-4. Of this decrease, 4,200 was due to the increased garrison of South Africa being found in 1904-5 within the ordinary establishments instead of being provided for by a vote for temporary additional numbers as in 1903-4. The balance of 4,561 was due to decreases in the field artillery, owing to the transfer of three batteries to the Indian establishment; and in the infantry owing to reductions in the establishment of regiments of Foot Guards (except the Irish Guards), and of infantry of the line at home and in South Africa. The establishment of the Royal Garrison Regiment had also been reduced from eight battalions to five battalions and a depôt. On the other hand there were small increases in the Army Medical Corps and the Army Pay Corps.

The money vote called for by the Estimates, and subsequently passed by Parliament, was £28,900,000, as compared with £34,500,000—the total of the original estimate for 1903-4,—a decrease of £5,600,000 if the army supplementary estimate of February 11th for £2,700,000 is taken into account. Among the causes leading to the reduction in the total vote were (1) reduction of establishment of Foot Guards by 94 men per battalion saving £50,000; reduction of establishment of infantry of the line at home by 50 men per battalion saving £175,000: discontinuance of enlistment into the militia reserve, £100,000; reduction of vote for ordnance factories, £185,000; and reduction in vote for stores and clothing owing to surplus stocks available after the war in South Africa, £750,000.

No part of the vote for 1904-5 was for the Somaliland expedition; while as regards the cost of the Thibet expedition, that is a charge which falls on the Indian Government. Parliament had to give its sanction to the expedition, but all the cost of it falls on the Indian Exchequer.

In a memorandum which accompanied the Estimates it was stated that provision had been made for a permanent garrison in South Africa. It was to be of 21,500 men, and to comprise four cavalry regiments, two batteries Royal Horse Artillery, twelve batteries Royal Field Artillery, two companies Garrison Artillery, six companies Royal Engineers, ten line battalions, and four garrison regiments, together with the necessary departmental units. The excess cost of maintaining this force in South Africa instead of at home was estimated at £1,360,000. Towards this cost no contribution is made by the African Colonies; except by Natal, which makes a grant of £4,000 a year. Cape Colony, the Orange River Colony, the Transvaal and Rhodesia contribute nothing towards this Imperial charge.

Included in the estimates was a sum of £400,000, part of a sum of £10,500,000 which Parliament decided in 1900 should be spent on the completion of coast defences in Great Britain, and on the provision of reserves of stores and clothing for the military forces. It was stated in the War Office memorandum that the stores of clothing were complete, and that nearly the whole of the artillery and machine guns to be provided in accordance with the policy laid down in 1900 was in readiness. The only exceptions were some of the heaviest guns, the patterns of which had not been finally settled. By the 31st of March, 1907, the re-armament would be complete, at a total cost of £3,150,000, for part of which large votes would have to be included in the Army Estimates for 1905-6 and 1906-7.

During the year 1903-4 there were 40,339 recruits (not including those for colonial corps), as compared with 50,753 recruits in 1902-3.

In the year 1902-3 the total expenditure on the Army was £79,360,399; but of this £39,307,000 was in respect of war charges in South Africa, as compared with £62,324,500, the war charges in South Africa for the year 1901-2.

Mr. Arnold-Forster, in explaining the Estimates to the House of Commons, dealt chiefly with the re-armament of the artillery. He did not touch upon the general question because at that time (March 7th, 1904), the Royal Commission had not yet made its report. As to re-armament, he informed the House that the authorities had decided on the type of the new gun, which they believed would be practically without a rival—certainly without a superior—in Europe. By a fortunate concurrence of circumstances he was not under the necessity of asking the House to sanction any cost under that head during the present year, the Indian Government being desirous of spending a portion of its revenue on re-armament, and the first supply would go to that part of the Empire.

The Royal Commission, of which the Duke of Norfolk was chairman, reported on the 28th of May. The reference to the Commission concerned only the militia and the volunteers. The Commission reported that in its opinion "the militia in its existing condition is unable to take the field for the defence of this country." "We think," the report added, "that its defects arise from causes beyond the control of its officers and men."

"If we deduct men below the age of 19," read the part of the report dealing with the volunteers, "we find that for the volunteers a strength of 270,000 (the

number of efficients in 1902), gives us a strength of 187,000 men fit as regards age to take the field. If we take 20 as the lowest limit of age, this number falls to 165,000. We have, however, received evidence to show that an appreciable number of volunteers classed as efficients are physically unfit for service in a mobile army. The efficiency of the different units varies greatly. Some reach a high level; but taking the force as a whole, neither the musketry nor the tactical training of the rank and file would enable it to face with prospect of success the troops of a continental army. The volunteer field artillery lacks the requisite training and mobility. The transport equipment and artillery material of the volunteer force are far from satisfactory."

For the militia the Commission recommended a six weeks' training instead of the month's training as hitherto, and that militiamen should be enlisted for eight years instead of six as at present. For the volunteers it urged management by a separate department at the War Office; that the force should be organized in its war formation of brigades and divisions; that the training of the force should be concentrated upon what was essential for its tasks in war; and that there should be fourteen days' training in camp each year, with adequate allowances in the way of pay for all volunteer corps.

Even were all these recommendations carried out the Commission was of opinion that the volunteers and militia would not be adequate to repel an invasion; and for that reason they urged the abolition of the militia and the volunteers and the adoption of conscription. Their plan was that young men of the age of twenty should serve a year with the military forces, and remain for the next three years liable to be recalled to their regiments in case of emergency. Such a plan would give, it was estimated, 350,000 men available for home defence. "We have," continued the report, "examined into the probable cost of the system, which we believe would be less than the present cost of the military forces. After some years there would be in the United Kingdom a very large number of men above the age of twenty-four who, having received a good military training, would be a source of reserve strength in case of great national emergency."

Within a week after the publication of the report of the Royal Commission, Mr. Arnold-Forster, the Secretary of War, was asked in the House of Commons whether the Government intended to base any legislation upon the recommendation in favor of conscription. "No," he answered, "the Government does not intend to make any proposals to the House in favor of conscription."

The proposals for reform were submitted to the House of Commons by Mr. Arnold-Forster on the 14th of July, when the House was in committee on the Army Estimates. Early in his explanation of them, Mr. Arnold-Forster recalled the figures of the British defensive force as it stood at that time. "We had," he said, "213,000 men in the British army. In India we had 77,000; in the Indian native army, 156,000; in the various colonial contingents, 18,000 men; and on our reserve list, 73,000. Of volunteers we had 240,000, and militia 91,000; and we had 126,000 men on the active list of the navy. Altogether we maintained 1,042,000 men for the defence of the Empire, exclusive of our colonial troops." He asked the House did it think that gigantic total necessary; and answering his own question, he said, "Frankly, I do not think it is."

As to the proposal of the Royal Commission in favor of conscription, he stated that were 380,000 men in service under that system, and the pay of the conscripted men not more than one shilling a day, the increase in the army charges would be £25,900,000 a year; and in making that estimate he had omitted the charges for horses and other incidental charges. "He had," he said, "discarded that particular remedy, and the Government had come to the conclusion that Great Britain did not require so large an army at home in time of peace as it had hitherto maintained. Moreover the time must come, and ought to come, when some of the 37 battalions now in the colonies would be withdrawn."

It took Mr. Arnold-Foster nearly an hour to explain the changes proposed in the army. Briefly summarised, but still keeping to the Secretary for War's own phraseology, the changes to be made are as follows:—

"It is proposed to absorb gradually fourteen battalions of the line—that is the 3rd and 4th battalions which have been added to some of the regiments in recent years. It is also proposed to absorb the five costly garrison regiments which were raised during the war. The battalions at home, 40 or 50 in number, will be reduced by 500 men each. The three years' system of enlistment will cease. A portion of the army will be enlisted for two years, with six years in the reserve and periodical training during the latter term. The remainder will be enlisted for nine years. They will spend six months at the depôt, and eight years and six months as general service soldiers. The number of officers for each reduced battalion will be only 20; but attached to each battalion there will be 10 officers of the type of militia officers, who after about a year's service will go into the reserve, but will come back at each training of the battalion."

In the Royal Artillery 100 of the best batteries are to remain exactly as they are. The remainder will be put on a short service basis in order to create a reserve. It is proposed to take 60 or 70 batteries and put them on a four-gun basis, a portion of the men to be enlisted for general service, and the remainder for for short service. The linked battalion system is to be abolished. Large depôts will be formed analogous to those of the Marines, the Guards, and the Rifle Brigade. A "striking force" of 15,000 or 16,000 men is to he stationed at Aldershot. The army corps system, by that name, is to disappear. The country will be divided into districts as recommended by the Esher Commission. The number of cavalry regiments is not to be altered. Something is to be done to relieve them of the difficulty caused by one regiment at home being linked with another abroad. With regard to the militia it is tentatively proposed to take 70 battalions, unite two battalions, and turn them into the territorial regiment of the county. The strength of the volunteers, "the best material in the army," is to be reduced in the first instance by absorption from 240,000 to 180,000 men. The proposals would effect little if any saving for the first year, but the scheme would enable future Secretaries for War to make progressive economies in army expenditure."

The War Office Reconstruction Committee made its

report earlier in the Parliamentary session than the Royal Commission on the militia and the volunteers; and in accordance with its recommendations in 1904 a new Army Council was constituted. The sanction of Parliament was not necessary to this, as the council was constituted under a warrant from the King to the Lord High Chancellor, directing Letters Patent under the Great Seal to be issued, appointing the following to be the members of Army Council:—The Secretary of State, Mr. H. O. Arnold-Forster, M.P.; First Military Member, Lieut.-Gen. Sir Neville Gerald Lyttelton; Second Military Member, Maj.-Gen. Charles Whittinghame Horsley Douglas; Third Military Member, Maj.-Gen. Herbert Charles Onslow Plumer; Fourth Military Member, Maj.-Gen. Sir James Wolfe Murray; Civil Member, The Earl of Donoughmore (Parliamentary Under Secretary of State); Civil Member, Mr. Bromley-Davenport, M.P. (Financial Secretary); Secretary, Col. Sir Edward Ward (Permanent Under Secretary of State).

It will be seen from the foregoing list of names that the personnel of the War Council will change with a change of Government, for three of the Members—Mr. Arnold-Forster, The Earl of Donoughmore, and Mr. Bromley-Davenport—are members of the Balfour inistry.

The duties of the Council are assigned among the members as follows:—First Military Member: Military policy in all its branches—War Staff duties, intelligence, mobilisation, plans of operations, training, military history, higher education, war regulations; Second Military Member: Recruiting, pay, discipline, rewards, peace regulations; Third Military Member: Supply, clothing, remounts, transport; Fourth Military Member: Armaments and fortifications; The Parliamentary Under Secretary: Civil business other than finance; The Financial Secretary: Finance, audit, accounting, estimates.

The British forces now compose what is described as a short service army. This term distinguishes it from the army of a generation ago. In the army, as it existed prior to 1873, men enlisted for 21 years, and at the end of that time were discharged with a pension. In 1873 this long service system came to an end, and in its place there was established what is now known as the short service plan.*

About the time the short service system was established, what is known as the territorial system also came into being. Formerly infantry regiments were known by numbers, and generally in addition by titles which belonged characteristically to the regiments, or which commemorated some event or incident of outstanding importance in regimental history. Nowadays and since the early seventies, infantry regiments are known by the names of counties. When the re-arrangement took place regiments were assigned by name to this or that county, and their depôts were then established in the neighbourhoods from which the regiments then took their names.

There are now 69 of these depôts, and English, Welsh, Scotch and Irish county names are borne by the various regiments. The idea at the bottom of the territorial plan was to give regiments territorial connections, to make them locally popular, and as far as was practicable to mass soldiers hailing from the same part of the country into regiments officially connected with the counties from which the men came. To this end, since the seventies, it has been the practice to recruit regiments from the parts of the country in which their depôts are situated. No matter where the main body of the regiment may be stationed, at Aldershot, at the Curragh, in India, or in Malta, its depôt remains in the neighbourhood to which the regiment is titularly attached. A staff of commissioned and non-commissioned officers of the regiment is stationed at the depôt. There the recruits are received; they are put through a long and hard course of preliminary training, and at the end of this course are drafted from the depôt to the colours.

Recruiting officers are permanently stationed in most of the large English towns and cities, and frequently these officers go on special duty into the country villages. London is, however, the great recruiting ground of the army.

There are still a few exceptions to this short service system. These exceptions apply to the regiment of household cavalry, to the corps of ordnance artificers, of the band of the Royal Military College, the corps of army schoolmasters, the corps of armourers, bandsmen in the foot guards, royal engineers who enlist for appointment as military machinists, and men enlisted for appointment as sergeant master tailors. Less than 2,000 men on an annual average enlist under this 12 year plan. All boys between 14 and 16, who are accepted to be trained as musicians, trumpeters, drummers, buglers, or tailors, must join for 12 years. The shorter service system, on the other hand, applies to cavalry of the line, royal artillery, infantry of the line, ordnance store corps, the army service corps, the foot guards and the medical staff corps, royal engineers, and the post office corps and royal engineers of the telegraph and railway reserve.

The age and physical conditions governing acceptance for the various services in the army in time of peace are as follows:—

CHEST MEASUREMENT AND WEIGHT.

The minimum chest measurement is fixed at 33 in., and the minimum weight at 115 lbs.; but the chest measurement and the weight of each recruit depend upon his height and the arm of the service he wishes to join, and are left to the discretion of the approving medical officers.

It is still possible under the short service plan for soldiers to re-enlist and to serve for 21 years. After this length of service has been put in, soldiers become entitled to pensions. For privates and gunners, the pension is from 8d to 1s 6d per day; for non-commissioned officers, 1s 3d to 3s 6d per day; for warrant officers, 2s to 5s per day. Soldiers discharged on account of wounds or injuries received in action, or for sickness incurred in the performance of their military duty, are entitled to a pension varying with the extent of the disability and with the length of service.

The increase in the rate of soldiers pay bringing it up to one shilling a day clear of all deductions dates from April 1st, 1902. The other part of the new scheme of 1902 came into operation on the 1st of April, 1904, and is governed by a Royal Warrant issued on March 27th, 1902, which sets out that—

On and after 1st April, 1904, the following further daily increases of pay shall be granted to all warrant and non-commissioned officers (including paid lance ranks); and to efficient soldiers, who have enlisted for more than three years with the colours, or have been permitted to extend their service, excluding Maltese or non-European soldiers, but including the royal garrison regiments:

SERVICE PAY.	d.
Efficient soldiers, Class I.	6
Ditto, after 5 years' total service	7*
Efficient soldiers, Class II	4
Ditto, after 5 years' total service.....	5*

* Increase of 1d. for good conduct.

Class I shall consist of all warrant and non-commissioned officers (including paid lance ranks); and of men who have completed 2 years' colour service, and who have, in the opinion of the officer commanding their unit, attained all necessary proficiency in the duties of their arm, including, in the case of infantry, such a standard in musketry as may be prescribed by regulation.

Class II shall consist of other soldiers who are allowed to extend their colour service, or who, having been enlisted for more than three years, are not placed in Class I; provided in either case that they have completed two years' colour service. Soldiers enlisted for three years with the colours, and, who have not extended their service, shall, if retained with the colours on account of war, be granted service pay during such retention.

The daily rates of pay of the several ranks of the different arms of the service now in force are as follows:

A soldier who has been in the army for not more than three months may claim his discharge on payment of £10. After three months the sum is £18, and in this case the permission of the commanding officer is necessary. Discharges by purchase, however, are allowed to the fullest extent consistent with the requirements of the service, and at ordinary times a soldier finds no difficulty in purchasing his discharge.

Until 1871, commissions in the army were bought and sold. Commissioned officers nowadays are drawn from the military academies at Woolwich and Sandhurst; and admission to these schools is obtained only after stiff examinations have been passed. In the army, promotion is by seniority. The pay of a lieutenant is 5s 4d a day; of a captain, 11s 7d a day; of a major, 16s a day; and of a lieutenant-colonel, 21s a day. There are some other allowances; but the pay and allowances of officers are not sufficient to maintain them in the style which, according to the social traditions of most regiments, officers are expected to keep up. Comparatively few of them are dependent entirely on their army pay.

What are described in England as the auxiliary forces comprise the militia, the volunteers, and the yeomanry cavalry. The militia is the oldest of these services. It is older than the standing army, and until the second or third decade of the nineteenth century all men not suffering from bodily infirmities due to age or other causes, and not specially exempted, were liable to be drawn by ballot for the militia. They could serve either personally or by substitute. Ballots were taken in counties until 1830 to make up the quota of militia each county was compelled by the law of 1760 to equip and maintain.

The militia is a local force, each regiment being raised in the division of the county in which the regiment has its head-quarters. It is called out each year for a period of training which cannot exceed 56 days, but which seldom is longer than four weeks. The men enlist for six years, and when under training their pay, their discipline, and the general conditions of their services are very similar to the conditions in the regular army. Until as late as 1871 the militia regiments in each county were nominally under the command of the lord lieutenant of the county; and nowadays, although there are examinations for officers' commissions in the militia, in issuing these commissions the War Department gives preference to local landed gentlemen who are recommended or nominated by the lords lieutenants, the King's representatives in the counties. In connection with the militia there is a reserve, consisting of men who have accepted extra bounties to hold themselves in readiness to serve abroad if need be in the regular army.

The yeomanry cavalry, which in 1900 was given the name of the Imperial Yeomanry, in its old form was a volunteer force, dating back to the Napoleonic wars. It was composed chiefly of tenant farmers. Many of the great landlords made it a condition in their farm leases that their tenantry should be of the yeomanry. For a long time the yeomanry was but lightly regarded as an auxiliary force. New life, however, was infused into it during the war. Its numbers were greatly increased; and under a royal warrant of the 17th April, 1901, the force was re-organized. It then became permanently the Imperial Yeomanry. The old brigade organization was abolished, and the force is now organized in regiments of four sections, with a regimental staff and a machine gun section. The regiments are under training in camp for sixteen days each year.

Members of volunteer corps are enrolled for three years, and are compelled to put in sufficient time at the drill hall, on the parade ground, and at the rifle ranges, and at the annual encampments, to make themselves efficient, and to pass the annual inspection before an officer from the War Department. Non-efficient volunteers can be sued in the courts for any loss falling upon their regiment in consequence of their failure to earn the Government grant. The officers are drawn from the ranks of the professional and commercial classes. There is no pay to the holder of a volunteer officer's commission. On the contrary, he incurs considerable expense in connection with his office, a fact which accounts for vacancies in many of the volunteer corps.

THE BRITISH NAVY IN 1904-1905.

It has long been the policy of British Governments—Liberal as well as Conservative—that the strength of the navy should be equal to that of the combined fleets of the next two largest naval powers. In recent years ship-building for the British Navy has been somewhat in excess of that requirement; and the feature of 1904 in British naval history may be said to have been the abandonment of the two-power policy.

There was no formal declaration of the abandonment of the old policy and the adoption of a more progressive one; but something equivalent to a declaration of this kind was made by Earl Selborne, First Lord of the Admiralty, in the House of Lords, on August 9th, in answer to a speech made by Lord Brassey, who had urged that as the two-power standard had been reached there should now be some retrenchment as regards new construction.

Earl Selborne reminded the House that the offer made by Lord Goschen, when First Lord of the Admiralty, to bring about a gradual reduction by agreement with foreign nations had never been withdrawn; and referring to the two-power standard, pointed out that in regard to cruisers and torpedo boats the standard had never had a numerical application. No other Admiralty in the world had to consider that the safe-guarding of its shores was the first duty of the navy, and that on it depended the safety of the food of the people, or had to safeguard a vast and prepondering

ocean commerce. Hence they could not compare the naval expenditure of this country with the naval expenditure of any two or more powers. The great expenditure on naval works was due to the fact that the question had been neglected for nearly two generations; and it had been necessary during the past ten years that Great Britain should overtake arrears.

In the same speech (August 9th), Earl Selborne defended the policy of building more battleships. "Nothing," he said, "was further from the truth than to say that the mine and the torpedo had relegated the battleship from the place which it had hitherto held. The lessons which he thought were to be learned from the war in the Far East were the importance of the personnel, the necessity of having a margin of strength, and the fact that without the battleship no power could either hold or win the command of the sea."

The Naval Estimates for 1904-5 came before the House of Commons on the 29th of February, when a vote was granted for 131,000 men and for an expenditure of £38,327,838—an increase of £2,500,000 over the vote for 1903-4.

The accompanying table shows how the £38,300,000 is to be expended :—

More than half of the increase over the vote for 1903-4 was due to the fact that in 1904 the balance still due on the two battlesbips bought from Chile was paid. These ships were in building in England when taken over by the Government. The sum of £1,875,000 was paid for the vessels, which subsequently went on to the navy list as the Swiftsure and the Triumph. The rest of the difference between the votes of 1903-4 and 1904-5 was due to the expansion of tbe fleet and to increased pay for the Royal Marines, following the increase of pay to the rank and file of the army which went into effect in 1903.

The Board of Admiralty, in a memorandum accompanying the Estimates, insisted that they had asked for nothing in the way of money votes from Parliament which they did not believe to he necessary to providing Great Britain with a navy strong enough to sustain a struggle with the navies of any two powers, and also strong enough to ensure reasonable safety to Great Britain's sea-borne trade and to the food supply of the people of the British Isles. "They have avoided and will avoid," it was added, "giving any stimulus to the expansion of armaments by the formulation of large programmes of construction. But when such programmes are adopted by other powers they have no choice but to take them into account in framing their own ship-building policy."

How the fleet is growing is shown by the fact that 4,000 more men were in service in 1904-5 than in 1903-4. Of these 2,400 are seamen and 1,300 stokers.

Between the 1st of April, 1903, and the 31st of March, 1904, there were completed and added to the Fleet Reserve :—

6 Battleships—Prince of Wales, Queen, Albemarle, Cornwallis, Duncan, and Exmouth.

9 Armoured Cruisers—Euralyus, Bedford, Berwick, Cumberland, Donegal, Essex, Lancaster, Monmouth and Suffolk.

1 Second-Class Cruiser— Challenger.

2 Sloops; 3 submarines; 11 torpedo boat destroyers 8 torpedo boats; 1 repairing ship and 1 surveying vessel.

There were under construction in 1904 :—

8 Battleships,	23 Torpedo boat destroyers,
13 Armoured cruisers,	11 Submarines,
1 Second-class cruiser,	1 River gunboat,
4 Third-class cruisers,	1 Admiralty yacht.
8 Scouts,	

Many of these vessels were out of the builders' hands before the end of 1904; and by April, 1905, there will in all probability have been added to the Fleet Reserve :—

3 Battleships,	8 Destroyers,
5 Armoured cruisers,	10 Submarines,
1 Second-class cruiser,	1 River gunboat, and
4 Third-class cruisers,	The new Admiralty yacht.

Had not the battleships built for Cbile been taken over it was the intention of the Board of Admiralty (with the sanction of Parliament), to begin the construction of three battleships in 1904. As it was only two were commenced. The other new work begun in 1904 included four armoured cruisers, fourteen destroyers and ten submarines.

The two battleships, which were begun in 1904, are to be of a new design, to be known in navy phraseology as the Lord Nelson type. One is in building on the Tyne and the other at Barrow-in-Furness. They will be the largest and heaviest war vessels ever built in Great Britain or in any other country. They are, in fact, as big as can be built with existing facilities at the Tyne and Barrow ship-yards. Each vessel will have a beam of 79 feet 6 inches, which compares with 78 feet of the King Edward VII, which was previously the latest type of battleship built in Great Britain. The new vessels will be 15 feet shorter than that class; being 410 feet long against 425 feet. The speed of the new ships will be 18 knots an hour; half a knot slower than the King Edward VII.

As has already been stated, the British Parliament voted an expenditure on the navy for 1904-5 of £38,327,000, The following are the amounts, given in round numbers, and in English currency, which the other naval powers—European and American—were expending in 1904 :—

France	£12,500,000
Germany	11,059,000
Italy	5,087,000
Russia (estim't'd normal expenditure	11,835,000
United States (estimates for 1904-5).	21,137,000

India now contributes £103,400 a year towards the maintenance of His Majesty's ships in Indian waters. The annual cost of the war vessels in Australasian waters is estimated at £530,000, which includes interest at the rate of 5 per cent. on the prime cost of the ships. The Commonwealth pays a proportion, which is not to exceed £200,000 ; and New Zealand £40,000. The annual cost of the squadron on the Cape of Good Hope station is approximately £278,000. Cape Colony contributes £50,000, and Natal £35,000. The annual cost of the North Atlantic Squadron is approximately £320,000, and that of the Pacific Squadron £190,000. Both squadrons patrol Canadian waters, but no contribution to this expense is made by the Canadian Government. Newfoundland, as her contribution to the navy, maintains a branch of the Royal Naval Reserve, which entails upon her an expenditure of £3,000 a year. The total contribution of India and the Colonies to British naval expenditure is £431,400.

Under agreements with the great shipping companies, sixty-two vessels are now on the Royal Naval Reserve and Merchant Cruisers List. Thirty-one of these ships receive subsidies from the Government, and are authorised to fly the Blue Ensign. The other thirty-one are held at the disposal of the Admiralty without subventions.

In April, 1904, Great Britain had :—

42 Battleships of the first-class,	10 Unprotected cruisers,
6 Second-cl'ss battleships	112 Torp'do boat destroyers
2 Coast defence ships,	34 Torpedo vessels,
18 Armoured cruisers,	85 Torpedo boats, and
104 Protected cruisers,	9 Submarines,

and there were at that time in building 108 other war vessels, on which about £36,000,000 was being expended, exclusive of armament. The total cost of the battleships and the other vessels already of the fleet above enumerated was put down at £108,000,000. The cost of the Fleet—maintenance and new construction—now averages 17s. 8d. per head of the population of the British Isles, as compared with 5s. 10d. per head in 1870.

Like the British Army the Navy is manned by volunteers, and there is no compulsory service in connection with it. A large proportion of the seamen enter the service as boys. They are accepted for training-ships up to the age of eighteen, and when a boy reaches the age of eighteen his term of actual service in the Navy begins, and must last for at least twelve years. To be accepted for a training-ship, a boy between the age of fifteen and fifteen and a half must be five feet and half an inch in height, with a chest measurement of thirty and a half inches. The height measurement is made without shoes. If accepted when between fifteen and a half and sixteen a boy must be five feet and one and a half inches in height, and thirty-one inches round the chest. Between sixteen and sixteen and a half a boy must be five feet two and a half inches in height, and thirty-one and a half inches round the chest.

The pay of seamen ranges from one shilling and three pence a day for ordinary seamen, to nine shillings a day for chief gunners and boatswains. Men who have put in nine years' service in the Navy can pass into the Coast Guard Service. Those who stay in the Navy for a period of twenty-two years become entitled to pensions. The amount of pension is from eighteen pounds a year, upwards, according to the rating on retiring from the ranks. The average pension for men of all ranks is £31 a year.

The Naval Reserve, as the result of changes which were made in 1901-2, is now of two branches, the Royal Naval Reserve and the Royal Fleet Reserve. The Naval Reserve is composed of men ordinarily in the merchant service, who put in a certain number of days training each year on board coast-guard ships, and who are liable to be called upon for service afloat in the event of war. The Fleet Reserve consists of men who have served twenty-two years in the Royal Navy and earned pensions, and of men who have served twelve years in the navy and have then transferred themselves to the Fleet Reserve. As with many seamen in the Royal Navy Service, for pension begins at eighteen years of age, there is always a large proportion of pensioners who are in the prime of life. Before the Fleet Reserve was established many of these men were of the Seamen Pensioner Reserve. In future in the case of men who receive pensions it will be obligatory on them to join the Fleet Reserve.

For the work of the British Navy the world is divided out into nine stations. These are Mediterranean, North American, Pacific, Cape of Good Hope, East Indies, China and Australia. In addition to the squadrons on these stations there is a Cruiser Squadron, the Channel Fleet and what is known as the Home Fleet. "Except for the small squadron France keeps off Newfoundland, and for the fleets of the States of the American Continents, we alone," said Mr. Goschen, in describing the naval-stations in his speech of March 10th, 1898, "have squadrons where other nations have isolated ships. When we have to reinforce our foreign squadrons we send out fully-manned and fully-commissioned men-of-war, so that at all times, besides our squadrons, we have traversing the seas a certain number of ships in commission, ready for war, if war should occur, at any moment."

In respect to coaling-stations, as in respect to the size of the fleet, Great Britain is admittedly without a rival. On the trade route from England to the East, by way of the Suez Canal, Great Britain has coaling-stations at Gibraltar, Malta, Aden, Ceylon, Singapore, Wei-hai-wei and Hong Kong. On the older route to the East, by way of the Cape, there are British coaling-stations at Sierra Leone, St. Helena, Capetown, Mauritius. In the West Indies the coaling-stations are at Port Castries on the Island of St. Lucia, and at Port Royal, Jamaica. Bermuda and Halifax are the coaling-stations in the North Atlantic. Esquimalt is the station for the North Pacific ; and in Australia the stations are on King George's Sound and on Thursday Island. Nearly all the stations are on islands, and are well defended. Gibraltar and Malta are regarded by naval experts as the only coaling-stations liable to serious attack, and they are so open to attack because both of them are within easy distance of European ports. Both of them, however, have exceptionally powerful defenoes.

MILITIA AND DEFENCE OF CANADA

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, especially in 1904, when a new Militia Act was passed (ch. 23, 4 Ed. VII.). By it the Militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows :

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45. being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time : Members of the King's Privy Council for Canada, Judges, Members of the Executive Councils of Provinces, Deputy Ministers of the Federal and Provincial Governments, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war,

The Active Militia, or any portion thereof, may be ordered to drill or train for a period of not more than 30 days in each year.

The Militia is divided into Active and Reserve Forces. The Active force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service, for the Active Militia, is three years ; for the Reserve Militia, such as is prescribed.

CANADIAN TEAMS TO WIMBLEDON AND BISLEY AND OFFICERS THEREOF FROM 1872 TO 1904.

Canada has always been represented by a team of its best shots at the annual Prize Meeting of the National Rifle Association of England. The first matches were held in 1872, at Wimbledon, but since 1890 they take place at Bisley. The most coveted of all prizes, the Queen's—now the King's prize (£250), was won twice by a Canadian: Pte. T. H. Hayhurst, 13th Regiment, Hamilton, Ont., in 1895, and Pte. J. S. Perry, 6th Regiment, D. C. O. R., Vancouver, B.C., in 1904. Many other important prizes have also been captured by our countrymen. The Kolopore Cup, contested for by the Mother Country and the Colonies was won six times by the Canadians: in 1872, '75, '81, '84, '89 and '96. Eight men compose the team.

Canada sends to Bisley twenty representatives to take part in the various matches open to them, and these men are selected by competition held at Ottawa under the Dominion of Canada Rifle Association. The first thirty on the list for the meeting of 1905 are:

THE CANADIAN MILITARY RIFLE LEAGUE.

It had long heen felt by riflemen throughout Canada that a bond of union and organization other than the Provincial and Dominion Rifle Associations, with competitions naturally restricted to a few days annually, was required to develop rifle-shooting throughout the extensive territories of the Dominion.

In 1893 the Canadian Rifle League was formed, with Headquarters at Toronto, the moving spirit and chief organizer heing Lieut. W. R. Pringle, of the 10th Regiment, Royal Grenadiers. Rifle associations from all over the Dominion affiliated, and a series of simultaneous matches on given dates was inaugurated, which have had a very marked influence upon rifle-shooting in Canada. Some years as many as 160 teams of 10 men each were entered. In 1895, the Honorahle the Minister of Militia and Defence was induced to grant free ammunition to the League teams, and with one exception this has been the rule ever since.

Four matches are held annually over King's ranges (200, 500 and 600 yards), and prizes given to the leading teams. The Lee-Enfield rifle is used. Marksmen's certificates, signed hy the Minister of Militia and Defence, and the Gen'l Off. Commanding, are issued as follows :—

For an average of 94 points out of a possihle 105, a first-class special certificate ; for 90 points, a first-class certificate ; for 80 points, a second-class certificate.

The competitions are divided into three series, as follows :—

The first (military) for teams of city corps of the Active Militia ; the second (military) for units other than city corps ; the third, or civilian series, for teams of Civilian Rifle Associations. The entrance fee per team is $10. Fees for additional teams from the same organization, $5 each. Organizations bringing five new men to the Dominion of Canada Rifle Association Meeting get free entry for one team to the C.M.R. League competitions for the following year.

By Militia Order of June 10, 1903, the C.M.R. League is placed under the supervision and control of the General Officer Commanding the Militia.

The annual meeting of the League takes place at Ottawa during the D. R. Association competitions.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred

Matter (other than newspapers and periodicals), wholly in print without reference to process, such as circulars, catalogues, calendars, hand-bills, books, pamphlets, printed forms, maps, prints, drawings, plans (without written specifications) engravings, lithographs, photographs (when not on glass or in cases containing glass) official or private post cards in quantities, sheet music (whether printed or written) instruction books in music, visiting cards, the manuscript of books or newspapers (whether hand-written or type-written) indented or perforated sheets of paper containing characters which can be read by the blind, botanical entomological and mineralogical specimens and the following partly-written and partly-printed matter:—militia and school returns, customs manifests, voters' lists, school or college examination papers, printers' proof sheets with corrections, exhibition entry tickets, municipal assessment rolls, Dominion and Provincial Government returns on official blanks, and all Dominion and Provincial Government documents, statute labor returns and municipal returns in general, etc., on which the rate of postage is 1 cent for each 2 ozs. or fraction thereof. To come within this class the material printed upon must be either paper, cardboard or parchment.

The following articles are subject to the rate of 2 cents for the first 4 ozs. or fraction thereof, and one cent for each additional 4 ozs.:—Seeds, cuttings (but not cut flowers), roots, bedding plants, scions or grafts.

Writing paper specially prepared for the use of the blind transmitted from a recognized Institution for the Blind in Canada to blind persons for their own use is allowed to pass at the rate of 1 cent for each 4 ozs. or fraction thereof; but before any Institutions can post such paper at the above rate the Post Office Department at Ottawa must be satisfied as to its claim to be considered an Institution for the Blind.

No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage when posted for delivery within the Dominion of Canada.

Printed or written *requests for return* are recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, the United States, the United Kingdom, the Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo, Ceylon, Cyprus, Falkland Islands, Figi, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, and Newfoundland, and to newsdealers in Canada, is fixed by law at ½ cent per pound, provided the distance in Canada which any such newspapers or periodicals are required to be transmitted does not exceed 300 miles from the place of publication. If the distance in Canada exceeds 300 miles from the place of publication the postage rate is ½ cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not *less* frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, or in the United Kingdom, or the British Possessions mentioned above, or the United States, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp

Newspapers and periodicals weighing less than 1 oz. each may be posted singly, if prepaid by Postage Stamp ½ cent each.

The postage on *bona fide* specimen newspapers, and on papers and periodicals published less frequently than once a month, is 1 cent per lb.

British and foreign publications may be posted by newsdealers in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, the United Kingdom, Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo, Ceylon, Cyprus, Falkland Islands, Figi, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Newfoundland, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, or the United States, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 3 lbs. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent for each 2 ozs. or fraction thereof under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided at least 1 cent is prepaid.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for

whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

Useful Hints.

Register all valuable letters. Transmit money by Postal Notes or Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right-hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. Every Parcel must be fully prepaid by postage stamps.

2. The dimensions of a Parcel addressed to the United Kingdom must not exceed 30 inches in length or 1 foot in width or depth, nor must the combined length and girth of any parcel exceed 6 feet. The dimensions of a Parcel addressed to any country other than the United Kingdom must not exceed 2 feet in length by 1 foot in width or depth.

3. A Parcel must not contain any explosive, combustible, or dangerous articles.

4. All Parcels must be securely and substantially packed and closed.

5. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

6. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

7. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and valuc of the Parcel; also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed.*

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fourth Class Matter.

Postage rate 1 cent per ounce or fraction thereof, to be prepaid by postage stamp. Miscellaneous articles of merchandisc, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

Foreign Post—Commercial Papers.

"Commercial Papers" are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll, when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

POST OFFICES AND RAILROAD STATIONS

IN THE DOMINION OF CANADA.

*The Offices printed in Italics are authorized to grant and pay Money Orders and Postal Notes. The Offices marked * are Savings Bank Offices. Offices marked † are authorized to issue and pay Postal Notes. (The number of Post Offices, not being Money Order Offices, authorized to issue and pay Postal Notes, is being increased every month so that many Post Offices besides those now indicated by a † in the list will issue and pay Postal Notes.) Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus:— O, Ontario; Q, Quebec; N S, Nova Scotia; N B, New Brunswick; P E I, Prince Edward Island; M, Manitoba; B C. British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan.*

The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the place or nearest railway station is situated. See list of Railroads and Steamboats on pages 172 to 176.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada" in the preparation of the following list:—

THE IMPERIAL SERVICE ORDER.

THE BRITISH GOVERNMENT.

The last General Election in Great Britain took place in September and October, 1900, when the Salisbury Government (1895-1900) was again returned to power by a majority over the Liberals, Radicals and Irish Nationalists of 134. The Marquis of Salisbury's Third Administration continued until his retirement from the offices of Premier and Secretary for Foreign Affairs, on the 12th of July, 1902. Mr. Arthur J. Balfour then became Premier, and the Ministry constituted at that time continued practically unchanged until September, 1903. Then Mr. Chamberlain retired from the Cabinet in order to be free to advocate a return to the protective system. Numerous other changes in the Ministry followed in consequence of the new importance given by Mr. Balfour to the fiscal question; and it was not until the October of 1903 that all the vacancies were filled, and the Government became constituted as stated below.

THE GOVERNMENT DEPARTMENTS.

THE TREASURY.

Chancellor of the Exchequer—Rt. Hon. J. Austen Chamberlain.
First Lord of the Treasury—Rt. Hon. A. J. Balfour.
Financial Secretary to the Treasury—Victor Cavendish.
Parliamentary Secretary to the Treasury—Sir A. Acland-Hood, Bart.
Junior Lords of the Treasury—Ailwyn E. Fellowes, W. H. Forster and Lord Balcarres.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the First Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Parliamentary Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

THE FOREIGN OFFICE.

Secretary of State for Foreign Affairs—Marquis of Lansdowne.
Under Secretary—Earl Percy.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is usually of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Secretary of State, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

THE COLONIAL OFFICE.

Secretary of State for the Colonies—Rt. Hon. Alfred Lyttelton.
Under Secretary—Duke of Marlborough.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary at War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. Hong Kong and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Newfoundland. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies.

THE INDIA OFFICE.

Secretary of State for India—Rt. Hon. Wm. St. John Brodrick.
Under Secretary—

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of His Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

THE HOME OFFICE.

Secretary of State for Home Affairs—Rt. Hon. A. Akers-Douglas.
Under Secretary—Hon. T. H. A. E. Cochrane.

The Home Department has the control of the London police force, and also the oversight of the police forces in the counties and municipal boroughs; and, generally speaking, the Department is responsible for the internal peace of the country. Prisons, convict establishments, criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining.

THE WAR OFFICE.

Secretary of State for War—Rt. Hon. H. O. Arnold-Forster.
Under Secretary—Earl of Donoughmore.
Financial Secretary to the War Office—W. Bromley-Davenport.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

THE ADMIRALTY.

First Lord of the Admiralty—Earl of Selborne.
Secretary to the Admiralty—E. G. Pretyman.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are officers without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are at the instance of the Foreign Office and the Colonial Office.

THE BOARD OF EDUCATION.

President—Marquis of Londonderry.
Secretary—Sir W. R. Anson, Bart.

The Committee of Council for Education or the Education Department, as it is popularly called, exercises supervision over the various departments of state-aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President was always of the House of Commons, and he was practically the Minister of Education. On the 1st of April, 1900, the Committee of Council for Education came to an end, and the powers it had exercised since 1839, enormously increased, however, since 1870, were transferred to a new State Department known as the Board of Education. The new Board was created under an Act of Parliament passed in the ordinary session of 1899. It consists of a President, the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. With the creation of this new Board there was for the first time a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council had been concerned chiefly with elementary education, except as regards the Science and Art Department. Now, however, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there was also created a Consultative Committee, which is to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are represented on the Consultative Committee. At the formation of the Balfour Government in 1902, and the retirement of Sir J. Gorst, Vice-President, the Marquis of Londonderry became the first President of the Board and Sir W. R. Anson the first Secretary.

THE LOCAL GOVERNMENT BOARD.

President of the Local Government Board—Rt. Hon. W. H. Long.
Parliamentary Secretary to the Local Government Board—J. Grant Lawson.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

THE BOARD OF TRADE.

President of the Board of Trade—Rt. Hon. Gerald Balfour.
Parliamentary Secretary to the Board of Trade—A. Bonar Law.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines and electric lighting. The Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

THE POST OFFICE.

Postmaster-General—Lord Stanley.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

THE BOARD OF AGRICULTURE.

President of the Board of Agriculture—Earl of Onslow.

The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

OFFICE OF PUBLIC WORKS AND BUILDINGS.

First Commissioner of Works—Lord Windsor.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Palace at Westminster, the Law Courts, and the public offices at Whitehall.

DEPARTMENT OF THE LORD CHAMBERLAIN.

Lord Chamberlain—Earl of Clarendon.
Comptroller of the Household—Viscount Valentia.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

IRISH AND SCOTCH DEPARTMENTS.

Chief Secretary for Ireland—Rt. Hon. Geo. Wyndham.
Secretary for Scotland—Rt. Hon. A. G. Murray, K.C.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

MINISTERIAL SALARIES.

The salaries received by the members of the Cabinet range from £2,000 to £6,000. The Lord Chancellor has also £4,000 as Speaker of the House of Lords. The political secretaryships and the under secretaryships of departments have attached to them salaries of £1,500 to £2,000 a year. Pensions are granted to such of the holders of Ministerial offices as after their retirement become too straitened in means to maintain themselves in a social position in keeping with the official rank they have held. These pensions are granted irrespective of length of official service. They range in amount from £1,000 to £1,200. At the present time only two of these pensions are being paid.

BRITISH IMPORT AND EXPORT DUTIES, 1904-5.

In view of the agitation now going on in Great Britain for a return to the Protective System which was abandoned in the fifties of last century, and of the likelihood that the next general election will be fought on this question, the editor of THE CANADIAN ALMANAC has deemed it well to include in the issue for 1905 the Import and Export Tariff of Great Britain, as it stood after the alterations and additions which were made in the British Budget for 1904-5. New duties were then added, and there were increases in the duties previously laid on several articles, notably tea and tobacco. But as the Tariff stands to-day all the duties are for revenue only; and up to the end of the Parliamentary session of 1904 no changes had been made with a view to the protection of agriculture or of any other British industry. For all practical purposes Great Britain is still on a free trade basis.

SOME FACTS ABOUT CANADA.

The earliest official records show that John and Sebastian Cabot, sailing under commission from King Henry VII of England, landed in 1497 on that part of the present Dominion of Canada known as Cape Breton in Nova Scotia.

Gaspar Cortereal discovered and named the Labrador coast in 1500.

Jacques Cartier, of St. Malo, France, acting under the authority and patronage of Francis I of France, discovered, in 1534, those portions of the Dominion of Canada now called New Brunswick, Prince Edward Island, and Quebec, and on his return to France presented the King with the first official record there is of the existence of these regions.

Captain Cook in 1778 gave the first authentic record of the discovery of Vancouver Island and the Pacific Ocean coast of the present Dominion.

Frobisher, Hudson, Parry, Franklin, Richardson, Back, Mackenzie, Simpson, Vancouver and others, between 1576 and 1847 explored and named the north and north-west coasts of the Dominion.

Colonization was practically begun in 1605-8. In 1605 Baron de Poutrincourt established Port Royal (now Annapolis Royal, in Nova Scotia), the first actual settlement by Europeans. In 1608 Champlain founded Quebec.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to His Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November, due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

Chief Justice of Ontario—Hon. Charles Moss ($6,000). *Justices of Appeal*—Hon. F. Osler, Hon. James Maclennan, Hon. J. T. Garrow, Hon. J. J. Maclaren ($5,000 each). *Registrar*– J. A. McAndrew. *Assistant Registrar*—Charles S. Grant. *Usher & Messenger*—E. Oliver.

High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the King's Revenue (including the condemnation of contraband or smuggled goods) as may be done by His Majesty's Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators

co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performanoe, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

Law Circuits.—*Sittings for Hearing of Actions.*—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of His Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

Weekly Sittings.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Tuesdays and Fridays. Court business on Mondays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

Chambers.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

Long Vacation extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

Courts for the Trial of Controverted Elections.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed $200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to $600; and to all bail bonds and recognizances of bail given in the County Court, to any amount; in actions of contract to any amount if parties agree to try same in County Court, for recovery of or trespass to land where land does not exceed $200 in value, partnership actions where capital was not over $1,000, for legacies not exceeding $200, where estate is $1,000 or under, to enforce mortgages or liens, or for redemption, or for equitable relief where claim does not exceed $200, to

establish claim on insolvent estate where claim does not exceed $400; but not to cases involving the title to lands of greater value than $200, validity of devises or bequests exceeding $200, nor where estate exceeds $1,000, or actions for libel, slander, crim. con., or seduction. An appeal lies to a Divisional Court.

COUNTY COURT SITTINGS AND COURT OF GENERAL SESSIONS.—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county, for the trial of issues of fact, semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in December and March, and the second Tuesday in May and September, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction, and (except in the County of York) a sitting for the trial of issues without a jury shall be held in each county on the first Tuesday in April and October in each year. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

COUNTY JUDGE'S CRIMINAL COURT.—Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions *may, with their own consent*, and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by said Judge; and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

COUNTY COURT TERMS.—The several County Courts in Ontario hold four sittings in each year, commencing respectively on the second Monday in the month of January, and the first Monday in the months of April, July, and October, except the County of York, which commences on the first Monday in April, and the second Monday in January, June and October, and ending on the Saturday of the same week, unless extended by order of the Judge.

COURTS OF REVISION.—The County Judges hold annually Courts of final revision of the Assessment Rolls of each Municipality, being in the light of Courts of Appeal from the first Court of Revision held by the Municipality; and also Courts for the Revision of the Voters' Lists for Provincial Elections.

SURROGATE COURTS.—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts.

DIVISION COURTS are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200 and the original amount was ascertained by the signature of the defendant, and to $100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each Judicial District is divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

THE LAW OF INTESTATES ESTATES.

DESCENT AND DISTRIBUTION OF PROPERTY.

As to all persons who died before the first day of January, 1852, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then where the net value of the real and personal estate does not exceed $1,000, same belongs absolutely to the widow, and as to any excess over and above said amount after payments of debts, etc., the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

GOVERNMENT LANDS, PROVINCE OF QUEBEC.

On June 30, 1902, about 6,623,507 acres of land have been surveyed by the Government of Quebec for sale.

Lands purchased from the government are to be paid for in the following manner:—One-fifth of the purchase money is required to be paid the day of the sale, and the remainder in four equal yearly instalments, bearing interest at 6 per cent. But the price at which the lands are sold is so low—from 20 cents to 60 cents per acre (10d. to 2s. 5½d. stg.)—that these conditions are not very burdensome.

The purchaser is required to take possession of the land sold within six months of the date of the sale, and to occupy it during two years from the date of the sale. He must clear and have under crop, in the course of four years, ten acres for every hundred held by him, and erect a habitable house of the dimensions of at least 16 feet by 20 feet. The letters patent are issued free of charge. The parts of the province of Quebec now inviting colonization are the Lake St. John district, the valleys of the Saguenay, St. Maurice and Ottawa Rivers, the Eastern Townships, the Lower St. Lawrence, Lake Temiscamingue, Gaspé and Metapedia Valley.

The Temiscamingue settlement, at the head of Lake Temiscamingue on the Upper Ottawa, consists of a level tract of many thousands of acres of rich calcareous clay.

THE REFERENDUM ON PROHIBITION IN ONTARIO.

The Liquor Act, 1902 (Ontario), provided in effect for the prohibition of the sale by retail in the province of fermented, spirituous and malt liquors. Boarding houses, clubs and societies were inhibited keeping liquors on their premises, and only limited quantities were to be kept by doctors and druggists, and by clergymen for sacramental purposes.

The Act further provided for a referendum to the voters, the question submitted being, "Shall the Act come into force?" It also provided that the Act should be put into operation if on the voting those in favor had a majority of the ballots cast, the number of ballots to be at least 212,723, figures which represented one half of the total vote in the general elections for the Legislature in 1898.

The voting took place on the 4th of December, 1902, and the result was that the total number of votes polled was 303 297, of which in favor, 199,749; against, 103,548. The votes in favor being 12,974 less than the stipulated number the Act was rejected. The supporters of prohibition had a majority of 96,201.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Fees are charged in many cases, and local rates must be raised. Every High School with two qualified teachers receives a fixed amount of $400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation to the Universities. There were 41 Collegiate Institutes and 94 High Schools, with 25,722 pupils, in Ontario in 1903.

Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality.

Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archæological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Curator of Museum. The Museum is open to the public from 9 a.m. to 5 p.m.

EDUCATION IN CANADA.

NUMBER OF THOSE WHO CAN READ AND WRITE IN 1891 AND 1901.

The Census returns of 1901 gave a population in Canada of 4,728,631 persons of five years old and upwards. Of these 3,918,915 persons could read and write and 129,584 persons could read only. There were, therefore, 4,048,499 persons in the total population of 5,371,315 who could read. That is 75·4 per cent of the total population as recorded in 1901, and 85·6 per cent of the population five years old and over.

The Census of 1891 gave a population of 4,279,634 persons five years old and over. Of these, 3,176,667 could read and write and 207,126 could read only. There were, therefore, 3,383,793 persons in the population of 4,833,239 who could read. That is 69·3 per cent of the whole population recorded in 1891, and 79·1 per cent of the population of five years and over.

It may be assumed then that the increase in literaoy in the ten years is 6·5 per cent. In every group of 100 persons five years old and over in 1901 there were 6·5 persons able to read more than there were in a similar group in 1891. That is, there were in every group of 100 persons of all ages about 30 persons who could not read and, therefore, could not write, and in ten years this sub group has been reduced to 24·6.

Synopsis of Fishery Laws.

Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of fire-arms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes.

The above enactments and close seasons are supplemented in special cases, under authority of the *Dominion Fisheries Act* (Chap. 95 R. S.), by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed: Department of Marine and Fisheries, Ottawa.

The Law Society of Ontario.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

LIFE ASSURANCE.

Life assurance in Canada may be said to be entirely conducted by companies incorporated by the Dominion Parliament. Their operations are governed by the provisions of their Charter and those of the General Insurance Act of Canada.

During 1903, 39 active companies were engaged in business, of which 21 were Canadian, 7 British, and 11 United States. The new assurances effected for the year amounted to $91,567,805, an increase of $11,014,839 over those of 1902. The amount effected in each of the three classes of companies was as follows:

Canadian Companies, $55,169,104, or 60% of the whole.
British " 3,132,904, " 4% " "
United States " 33,265,707, " 36% " "

The aggregate assurance in force in Canada at the close of 1903 was $548,443,000, or $39,630,695 in excess of that existing at the close of 1902. The total was distributed thus:

Canadian Companies, $335,638,940, or 61% of the whole.
British " 42,127,260, " 8% " "
United States " 170,676,800, " 31% " "

That life assurance has developed and increased with the progress of the country, is abundantly evidenced by reviewing the figures contained in the following table, which sets forth the total assurance in force at the four periods, 1875, 1885, 1895 and 1903.

TOTAL ASSURANCE IN FORCE.

Year.	Canadian Companies.	United States Companies.	British Companies.	Total.
	$	$	$	$
1875	21,957,296	43,596.361	19,455,607	85,009,264
1885	74,591,139	49,440,735	25,930,272	149,962,146
1895	188,326,057	96 590,352	34,341,172	319,257,581
1903	335,638,940	170,676,800	42,127,260	548,443,000

It will be observed that in the period of 28 years the total life assurance in force has increased 545%. The Canadian Companies have increased their totals in the same time 1,429%; the United States Companies 291%; and the British Companies 117%.

The premium income of the Companies has kept pace with the increased volume of business, and in 1903 amounted to $18,240,265. The progress since 1875 has been uninterrupted, and is indicated below:

PREMIUM INCOME.

Year.	Canadian Companies.	United States Companies.	British Companies.	Total.
	$	$	$	$
1875	707,256	1,551,835	623,296	2,882,387
1885	2,092,986	1,723,012	803,980	4,619,978
1895	5,702,783	3,452,295	1,137,366	10.292,354
1903	10,882,650	5,922,297	1,435,318	18,240,265

In the 28 years the amount paid by Canadians for life assurance has increased by 533%. The Canadian Companies' premium income in that time has increased 1,439%; the United States Companies 282%; and the British Companies 130%.

The death rate in 1903 among the active companies was slightly above the average of previous years, being 11.00 per 1,000.

The figures for the past 10 years are as follows:—

DEATH RATE.

Year.	Death-rate per 1000.	Year.	Death-rate per 1000.
1894	10.33	1899	10.73
1895	11.17	1900	11.23

1897	10.91	1902	10.30
1898	10.55	1903	11.00

The total amount paid on behalf of policyholders during 1003 for death claims, matured endowments, surrendered policies, and dividends, amounted to $10,288,364. The practical benefits of the system of life assurance in Canada is exhibited in the following table, setting forth the payments made by companies under their contracts in each of the last six years:

Year.	Total Amount paid to Policyholders.	Year.	Total Amount paid to Policyholders.
1898	$6,782,006	1901	$8,993,125

FOREIGN BUSINESS.

During recent years some of the Canadian Companies have extended their field of operation to places outside of Canada. This remark especially applies to the Canada Life, Confederation Life, Manufacturers Life, North American Life, and Sun Life.

SYSTEMS OF ASSURANCE.

On the following page will be found the premium rates of the principal companies for quinquennial ages, upon the ordinary systems of assurance, viz.: Whole Life; Whole Life with premiums limited to 10, 15, and 20 years; Endowment Assurance payable at the end of 10, 15 and 20 years, or at prior death with annual premiums limited to those periods. It will be observed that the premiums of the different companies vary very slightly. This is only to be expected in view of the fact that the same mortality table (the Institute of Actuaries Healthy Male Table) and the same rate of interest (3½%) are employed by practically all of the Canadian Companies.

BASIS OF RESERVE.

The Dominion Insurance Act stipulates that the valuation of policies of assurance shall be made on the Institute of Actuaries (Hm.) Table of Mortality, and a rate of interest not exceeding 4½%. It further stipulates that the rate of interest shall be modified to 4% in 1910, and 3½% in 1915. Several of the companies have already placed their reserves upon the stronger 4% Standard, while some have even gone so far as to anticipate the extreme 3½% rate.

INVESTMENT POWERS.

Prior to 1899 the investment powers of Canadian Life Assurance Companies were determined by their respective Acts of Incorporation. At the 1899 Session of the Dominion Parliament the General Insurance Act was amended, enlarging and making general the investment powers of the companies. A detailed statement of the investments of these institutions will be found in the Yearly Report of the Superintendent of Insurance for the Dominion.

ANNUAL RETURNS.

The General Insurance Act requires each Company to make to Government a sworn return, embracing great detail, each year not later than the 1st day of March. These returns include statements of receipts, expenditures, assets, liabilities, policies issued and policies terminated. They are subsequently published in the report of the Superintendent of Insurance.

Ontario's Mineral Lands

THE Crown lands of Ontario afford an inviting field for the prospector and the miner. The mineral belts are numerous, extensive and easily prospected, being for the most part convenient to railway and canoe routes. They contain the ores of iron, copper, nickel, gold, silver, cobalt, zinc and lead; also arsenic, graphite, corundum, mica, talc, actinolite and other useful minerals, as well as building stones, brick, clay, limestone, marble, etc., in great variety.

The silver-cobalt-nickel-arsenic ores of the Haileybury region found in 1903 and 1904 rank among the richest ores of the world.

The mining laws are liberal and the prices of land low.

Watchers of the Trails

Illustrated by CHAS. LIVINGSTONE BULL

CLOTH, - $2.00

"The Watchers of the Trails" is a companion volume to "The Kindred of the Wild," and is a collection of his latest stories, written with that same sincerity and truthfulness which marked their foreruuners. Like the stories in "Kindred," these tales are redolent of the deep forest, and full of the wonderful descriptions of the magical beauty the author's eyes have seen. Each one has directness and definition and action ; each one shows the ways of nature with her children ; and each one is told with fine restraint and the most subtle art.

NOVELS BY CHARLES G. D. ROBERTS

The Prisoner of Mademoiselle

Cloth, Illustrated, - $1.50

The scene of this new novel is laid in Mr. Roberts' dearly-beloved Acadia, and the incidents are based on the famous siege of Louisburg. The hero is a young British officer who sails from Boston in command of a company of the king's troops, only to be taken captive by the Grand Seigneur of Louisburg, and to fall a prisoner to the charms of the Seigneur's daughter, the fair mademoiselle.

The story is written in Mr. Roberts' characteristic style, and is full of delicate humor and dainty grace and fascinating touches of outdoor life. Added to that are scenes of tenseness and strength which surpass those in "The Forge in the Forest," and it is easy to be seen that here is a romance worthy of enrolment in the list of Mr. Roberts' work.

A LADDER OF SWORDS

A TALE OF LOVE, LAUGHTER AND TEARS

Beautifully illustrated with reproductions from a series of paintings, the work of the famous Kinneys.

Cloth only, $1.50.

IN wholly different vein from the author's last novel, "The Right of Way," comes this exquisite romance, delightful in conception, swift and compelling in interest, and written in the finished style of this great novelist. The story recounts the love of two Hugenot refugees and their fugitive life on the island of Jersey in the British Channel. Later the scene changes to England, where exciting intrigue and startling situations in the Palace of Queen Elizabeth result in repeated dangers for the faithful lovers, but they finally escape the hazardous favor of the great queen and are united. The scenes on the island of Jersey are of idyllic freshness and beauty, and in the Seigneur of Rozel, the lord of the island, the author has produced a character of delightful humor and braggadocio. It is a thoroughly rounded, satisfying story, written with brilliancy and charm of style.
